

Submitter: David Wall  
On Behalf Of: Mr Oregon SUPPORTS SCR 13  
Committee: House Committee On Rules  
Measure, Appointment or Topic: SCR13

I SUPPORT [SCR 13].

I fully enjoy a three (3) inch T-Bone, medium rare if you please but let us not forget the hypocrisy of our learned Legislature.

The destruction of cattle by Wolves is a serious issue.

The remedies are inadequate to remove Wolves and the lackluster and grossly inadequate monetary compensation and administrative process is unacceptably despicable.

Elk invasions to pastures consuming field grasses and feed hay for cattle continue to plague farming and ranching operations without adequate compensation.

The unabated idiocy of the Legislature who constantly support the issues, cattle burps and farts are bad for the environment trumpeted by climatologists who grab and twist the Legislators short and curlies to support their perverse environmental scams.

The Legislature's imbecilic attack and corresponding costly edicts on Confined Animal Feeding Operations (CAFO) to save the planet will accomplish nothing but to buy 'votes' and 'donations' from environmentalists should not be forgotten come voting time.

The constant threat of Buffalo Brucellosis emanating from wondering infected Buffalos from Yellowstone has many ranchers and farmers staying up at night, wondering if Federal and State Officials might issue death warrants to entire herds of cattle over one cow coming down with Brucellosis.

I am sure I have forgotten other legislative plagues hoisted upon farmers and ranchers but I have to get back to the serious issue of barbequing my T-Bones. Yeehaw!

David S. Wall

Mr. Oregon Concurs and says, "Don't forget the tasty Pale Ales swimming in a sea of ice water in galvanized tubs! Maybe this issue should be officially recognized by the Legislature."
