Senate Committee On Rules

Measure, Appointment or Topic:

SB1003

As a Physician Associate, I work under the supervision of a physician, but with tremendous autonomy. So much so that I only see my supervising physician about 4 times a year. SB 1003 broadens the definition of who can prescribe lethal drugs and that is a dangerous road to go down. PAs and Nurse Practitioners are not appropriate providers for this high level of medical decision making. Do not pass SB 1003.
