

Submitter: JOHN LLOYD SCHARF
On Behalf Of: First victim of homicide
Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB1003

Someone will die needlessly and likely criminally from the seduction of this bill. I write this to deny all responsibility corporately and individually to the legality or morality of this bill. Make no mistake, there will be a person who dies because it is used by some psychopath to justify lifetaking.

I expect you to wilfully ignore this, but it is my duty to name you as co-conspirators to first homicide. In Oregon law, "willful ignorance" generally refers to a situation where a person suspects that a fact exists but deliberately avoids learning about it to escape legal responsibility. Immunity from your conspiracy in this law is unjustifiable. Even considering it should make you culpable. SEE: United States v. Jewell

May G*D have mercy on your souls. When the first dies from it, that mercy of forgiveness is beyond my natural powers.

I have no delusions the legislators of Oregon have any common sense because this elite has powers, privileges, and immunities to the teratogenic misrepresentative laws you create. Common sense comes from a common people living under the common circumstances.

You have no capacity for common sense as long as you are an elitist who has no mandate to refer this to the people for a vote. You would not be an elite without your special powers, privileges, or immunities to the very laws you create.

It is this fact that causes me to part ways with republicans who assume some elite, which never punishes itself, to be accountable in their claims of what is the "greater good" when we know they do not have the common sense of the majority of my neighbors. You are a detached, self-indulgent, detached elite.
