

Submitter: Teri Sykes

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: SB1003

SB 1003 would...

Broaden language to allow non-physicians, like physician assistants and nurse practitioners, to facilitate and administer assisted suicide;

Cut the state's 15-day waiting period in half;

Require hospices and hospitals to promote and disclose whether they participate in assisted suicide to every patient admitted to their facility, no matter their diagnosis.

I object to the further promotion of assisted suicide and believe this proposed legislation reducing or eliminating current restrictions will harm vulnerable populations.

Respectfully,  
Teri Sykes
