Senate Committee On Rules

Measure, Appointment or Topic:

SB1003

The first duty of every physician is to Do No Harm to his patients. It is an extremely slippery slope to codify and legislate exceptions and allowances to the law that any intentional taking of a human life is murder. There are a plethora of extremely powerful pain relieving drugs available to those who are suffering from agonizing pain. Those who suffer from despair and despondency should be compassionately counseled and encouraged, not killed. I strongly oppose this bill and any like it.

For the love of God and humanity.
