

Submitter: Scott McClure

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB3654

The City of Turner would like to express our support for this bill. Small cities many times have difficulty paying for the engineering to develop a grant ready project and then have trouble finding matching funds. This bill would be extremely helpful by lowering matching requirements.

The bill also would fix a probably inadvertent inequity with matching requirements. Right now, for a \$1,000,000 project, a large city and a small city pay the same match, even though the larger city has way more resources available.

Thank you for your consideration for a bill that would help small cities provide better services to their citizens.

Scott McClure
City Administrator
