SB1153

I oppose SB 1153

Please don't mess with our water rights.

This bill is double charging those of us who have paid to have wells dug, & routinely maintain our own individual water systems. We have already paid, and continue to pay for the equipment to access our water. This is not where the water waste comes from. Individuals with wells are very conscious of our water usage, because if we over use this resource, we will need to deepen our wells, or look for other water delivery methods, at great personal cost, and most of us do not have the option of simply signing up for public access water sources.
