

Submitter: Shawnda Horn
On Behalf Of:
Committee: Senate Committee On Rules
Measure, Appointment or Topic: SB1003
Honorable Senators:

I'm writing to ask to you to oppose SB1003. It is heartbreaking that the Senate would consider making doctor assisted death more frequent and less safe with little time for real help from the medical profession for patients. We should value our citizens and those who travel here for such an egregious process. It is my hope that you will value the life of a fellow human being more than value their death, and add more restrictions or eliminate the option completely for our health professionals to violate their oath and help harm an individual through prescribing medications to end their life. Please vote NO on this senate bill.

Thank you for your time and consideration.
