Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

I strongly oppose SB 1153. This bill is overreaching and will harm our agricultural communities. In areas such as the Klamath Basin, there is already an over abundance of environmental and tribal oversight and review masked as a thinly veiled power play.

Without a healthy agricultural community, which relies on water, Oregon will strictly be a place of homelessness and poverty. We saw what the same oversight did to the timber industry, let's learn from that and not continue to push these over-regulated bills!!
