

Submitter:

George Buettner

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

The system in place has worked for years. What is the purpose of increased demands and regulations on those who produce our food products with the added cost passed on to the general consumers. This state has sought every way possible to increase the tax burden of it's citizens and citizen farmers and workers. This bill needs to be defeated in hearing, not to see the light of day.
