Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

Just as the Fire map is not about fire, this is not about true protection but control. Here is why the process is flawed, and not in disrespect to legislators, only those who perceive

cultural Marx-ism as a value. Below are quotes from the principles in this long charade:

Some historical quotes to gain proper understanding of Orwells Theory of Doublespeak & Doublethink concerning the deception in Climate political language. Orwell noted:

Doublespeak: language that deliberately obscures, disguises, distorts, or reverses the meaning of words. ( author ) this is major element of Socio-communism.

Doublethink: is to know and to not know, to be conscious of complete truthfulness while telling carefully constructed lies, to hold simultaneously two opinions which cancel out, knowing them to be contradictory and believing in both of them, to use logic against logic.

Quote: "The common enemy of humanity is man. In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill. All these dangers are caused by human intervention, and it is only through changed attitudes and behavior that they can be

overcome. The real enemy then, is humanity itself." — Club of Rome. Founded 1968.

Quote: "No matter if the science of global warming is all phony... climate change provides the greatest opportunity to bring about justice and equality in the world."- Christine Stewart, former Canadian Minister of the Environment.

Quote: "The data doesn't matter. We're not basing our recommendations on the data. We're basing them on the climate models" Prof. - Chris Folland, Hadley Centre for Climate Prediction and Research.

Quote: "Global Sustainability requires the deliberate quest of poverty, reduced resource consumption and set levels of mortality control." ( Read Eugenics ) - Professor Maurice King —Director of the UN Rio Accord-

Quote: "the resultant ideal sustainable population is hence more than 500 million but less than one billion." - Club of Rome, Goals for Mankind.

Quote: "Current lifestyles and consumption patterns of the affluent middle class - involving high meat intake, use of fossil fuels, appliances, air-conditioning, and

suburban housing - are not sustainable.” - Maurice Strong, 1992 Rio Earth Summit. Mr. Strong was a Brundtland Commission senior member. Two links for proper education on Oregon subordination, which leads to these trickle down micromanagement items.

Oregons decline into the U.N. Matrix:

In conclusion, Sir Julian Huxley, considered Mankind beneath all species - He was UNESCO's education Director -Oregon used UNESCO, as well as continuing with Common Core, Sustainable Development, CRT and now DEI. And the Education committee thinks more funding. Nope, stopping the dysfunctional Family abuse is the answer.
