Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

We have enough water protection laws already. We continue to heap mind numbing regulations on the people that feed us. How long before we are 100% dependent on foreign food sources for survival. That will not be pretty. We must stop strangling ourselves under the guise of environmental protection. Yes, we need to be wise stewards of the resources we have, but that is not accomplished by piles of ridiculous bureaucratic nonsense that kills small farms and benefits no one...except the bureaucracy! Let's use common sense and realistic approaches to feeding Oregonians and using the resources available to us wisely.
