

Submitter:	john hartman
On Behalf Of:	Water Quality
Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB1153

I stand in full support of SB 1153. For far too long, people have taken without much thought on the consequences. Sadly, the environment is now reminding us as to our central folly: that whatever humans desire is the right position to take. It is becoming rapidly clear that the planet cannot absorb much more human hubris. We edge closer and closer to the tipping point and still we scream for more rights. SB 1153 is not the entire solution to the crisis we face but SB 153 is certainly better than simply kicking the can down the road. Please pass SB 1153
