

Submitter:	Robert Egner
On Behalf Of:	Constitutional Free People
Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB1153

I am strongly opposed to thus bill.

The government needs to stay out of water related issues. Stop attacking our farms, ranchers, crops etc. They need water rights and access to clean water for our food.

The government is pushing out our ranchers and farmers and as a result our population is relying more on processed junk which attributes to accelerated health issues.

In my community specifically the environmental groups got a uneducated judge to agree with their drawdown plan that actually ended up doing nothing positive for the salmon, hurt our actual native run for Winter Steelhead and rose water temps that killed Salmon eggs.

Truthfully you legislators need to stop listening to these groups that are running around with blinders on and only giving you negative information that fits the narrative they want to push you towards. The studies they give you are cherry picked information written by supposed "industry/environmental professionals" that are really just people the environmental groups choose because they graduated from a professor that has spent their life literally rolling dice and creating issues for them to solve later.

No on SB 1153! Leave our water sources and Inalienable right to life alone. No!
