

Submitter:

Mark Adams

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

Legislature is way over stepping its bounds on this issue. Its one thing to tax a water system that provides a service to a residence or business, but to try and tax what God (not the Government) gave to all mankind is arrogant and offensive. Leave the farmers and land owners alone. If you need more money, start reducing the size of Government and allow the citizens to provide for themselves. You elected officials can and must do Better than this type of stupid legislation. Sent from a life long Oregon Native of 66+ years. Thanks for reading this.
