Measure, Appointment or Topic:

SB1153

I urge you to support SB 1153. I am a retired biologist who spends a great deal of time in the riparian habitat of the Deschutes River. For the last two decades I have seen the dramatic drop of water quality due to inadequate flow when the diversion to irrigation channels begins. The water level of the Deschutes plummets and water temperature rises. It is so damaging to all aquatic organisms and riparian wildlife that depend on stable flow and temperatures in the Deschutes River.
Thank you for your consideration of supporting this bill.
