

HB 2084 -5 – Tax Compliance as a requirement for doing business with the state

House Committee Revenue – Jody Wiser – 6.3.2025

My name is Jody Wiser and I am representing Tax Fairness Oregon, a network of volunteers who advocate a rational and equitable tax code. Do the state's business and providing state-issued licenses only to those who file and pay taxes clearly falls under having "a rational and equitable tax code."

I want to commend Zack Hudson and his office and the several others who have worked diligently to design a bill that should work for all involved. Today's -5 and the earlier drafted amendments have repeatedly been responsive to issues that have been raised.

Let us hope that implementation of HB 2084 with the -5 amendment will mean that we no longer read stories in the press about tax scofflaws who are doing business with the state.

Good bill. Do pass.

We read the bills and follow the money
