SB1153

As a 31 yr small family farm property, we oppose the use of meters for individual wells of normal/average water use, and are properties not being used for pot grows.. Our individual family properties are now surrounded by illegal pot grows, that drain our valley's underground aquifers, and water pressure..that need to be dealt with instead. There needs to be a bill that deals with the legal, and illegal Marijuana grows, and the water they ultimately steal from individual family properties, as well as the run off of pesticides into our ground water, as well as creeks, rivers, and waterways..
