Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

I'm writing to express my great support for SB 1153. I believe this bill would significantly increase the protection of flows in our state's rivers, which are not only public resources for citizens but also serve as critical habitat for native fish, amphibians, and wildlife.

Oregon's rivers are nationally- and internationally-known and celebrated resources and I believe it is incredibly important to do what we can to protect, restore, and conserve them for today and for future generations.

Thank you for your support!
