

Submitter:	Cathryn Davenport
On Behalf Of:	SB 1153
Committee:	Senate Committee On Rules
Measure, Appointment or Topic:	SB1153

We, as Oregonians, must do all we can to protect our water supplies to ensure sustainable, safe, and fair clean water for all inhabitants of this state. Inhabitants include the native flora and fauna. Therefore there should not be any loophole that allows water right transfers that negatively impact flora and fauna “or contribute to water quality impairment in water limited streams.”

There is only a finite supply of fresh, clean water. I implore the community members to oppose this bill.

Thank you in advance for your time and consideration of this request. Thank you too for committing to the representation of all Oregonians. We are so fortunate to live here.

Cathryn Davenport
