Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

Once again Oregon is trying to be like California by taxing and/or putting fees onto its citizens like the Private Property wells water use . Private wells should NOT be under government taxes for water use. The government does nothing to pay expenses to drill the well or even maintain the well. This burden all falls on the property owners yet you want to tax the water! Oregon legislators need to step back and stop trying to Siphon every penny they can from property owners. If you don't stop these insane legislation moves, Oregon will soon become like California and you will see a mass Exodus from Oregon to tax friendly states . Right now Oregon is Not listed as tax friendly or even a desired place to retire. You may not have a sales tax, but you are constantly proposing ways to drain your citizens' pockets.
