

Submitter:

Adam Hill

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

The well my family has drank from for over 25 years has nourished us, bathed us, and kept our property green for longer than I can remember. Water that hasn't been treated by the city or state should not be taxable in any form, as there is no service being provided. If this measure were to be passed, we would be being taxed for a service we are not receiving, and would be losing our free access to a natural resource that all humans should have rights to without cost or taxation.
