

Submitter:

Katherine Larpenteur

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1153

Leave agriculture rights to benefit the OR farmers. We need them to produce food for our state & nation. OR water ways provide water to stop fires, for rural and urban communities needs and have healthy fisheries. Don't fix what isn't broken, don't divert the water from the needs of all our OR people. CA agricultural politics destroyed CA growers and water needs for their people, not in OREGON! Our state should not follow down CA's rabbit hole. Agricultural industries provide income and healthy communities. Leave all the waterways, dams and fisheries the way they are, they are strong, Our OR's water is to be managed for all Oregonians not for any other state.
