Senate Committee On Rules

Measure, Appointment or Topic:

SB1173

If a HealthCare Facility accepts a product from a seller or Manufacturer, the Facility needs to know that the product given to them is safe. The facility needs to be responsible or we are right back to COVID lies and negligence. These doctors were aware of the dangers of the COVID JAB, but applied it anyway. They are just as guilty as the pharma that provided it, along with the negligence of NOT providing Ivermectin, HQC or anything that may have saved their lives. Physicians and Facilities ARE responsible!
