

Submitter:

Paula Grissom

On Behalf Of:

Committee:

Senate Committee On Rules

Measure, Appointment or Topic:

SB1154

This is the grass seed capital. If the water is taken from our farmers this will not only impact our families and homes here but will take from many who bring revenue into our state. We need to oppose and save our farmers and small residential homes. Our generations to come will be impacted. Please pray and place in full consideration of others, land, animals, and lives.

Thank you,
(a small family farmer)
Paula
