Senate Committee On Rules

Measure, Appointment or Topic:

SB1154

1154 even with the 3 amendments is a bad bill. It misses the mark regarding funding, implementation and potential negative impact to our state water policy. Oregon DEQ already has the authority to establish Groundwater Quality Management Area under ORS 468B.175-188. This bill clearly gives the governor ultimate authority (clearly articulated on pg 13 lines 1-30 SB 1154-A3). Farmers and ranchers are worried about this bill crushing them. The fact that the majority of testimony on this bill is opposed should have some bearing. I urge you to oppose this bill.
