

Submitter: Joann Rossi

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Resident of Oregon 18 years, former employee of ElDorado County Placerville, CA..Tax Collectors office and Assessors Office.

Contest our Property tax procedures..Reason: No Supplemental billing occurs, this means a person that buys a home does not get taxed until the next tax roll, where as they should be put on tax roll as soon as purchase occurs, they use all reasons for taxing in this time, we loose an extreme amount of money by not addressing our system that is way out of date.

Second..Signs placed on Starr ST in Sublimity, to slow traffic by school, these are places within 15-20 feet before crossing, which has a stop sign, normal cars slow at this distant anyway, yet the signs were placed and then they were proud of them..I wrote saying not in correct place, no answer..Corners of all four should be marked yellow fifteen feet from corner due to safety for the children, only ones in front of school and across in front of school are marked, yet the heavy area that is to the north side of school remain unmarked and cars park to the corner, making street invisible for traffic controllers complete view of safety of a child that will run out between cars..as one did and were were driving slow so did not hit her. The signs that were to curb speeding that first spoke about, do not change how anyone drives on the road..so they are a waste of money..Too many items like this are in Oregon..no one really cares if children get killed or not, as long as they look good.. There are many such violations in our area so if this is true I cannot believe that it is not elsewhere..Californina has instituted a law that at all schools all four streets that make up an intersection are marked for children's safety..they are making lots of money off of tickets..Joann Rossi
