

Submitter: Donna Murdock

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I take the bus to work every day and am lucky to live in an area with 3 bus lines within walkable distance from my apartment. However I work with many people who do not take the bus because there is no bus line close to home or the bus service is so infrequent as to preclude it's usefulness. If we do not expand public transportation much more aggressively than planned and if we do not simultaneously make that transport electric we are condemning ourselves to a future of traffic jams and anthropogenic climate chaos.
