

Submitter: Julie Zalace

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

All my life I have taken public transit when it was available and safe. I know from experience that it can be economical and it removes stress. As people age driving becomes more difficult. Without a viable public transportation system people are trapped in their homes. I am old enough to remember the smog that used to be in many American cities - it literally hurt to breath and children could not play outside. Public transportation can help us keep the air cleaner.
