Senate Committee On Rules

Measure, Appointment or Topic:

SB1154

The amendments make this bill better but it is still not acceptable. It misses the mark regarding funding, implementation, and potential negative impact to our state water policy.

The dash 3 amendments show some improvement but is still potentially devastating. A bill with this much power should get a lot more buy-in from state farmers, ranchers, and other stakeholders. Please think about voting against this bill and taking more time to figure out what you want. Give more power to local and regional authorities and less power to the state. The problem is there. This bill is not a good solution.
