On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

Legislators representing the State of Oregon ~ BE AWaRE that the citizens cannot continue to financially support all these "necessary taxes" you are trying to impose on the working people of Oregon. Due to so many additional costs being passed onto the workers of the State, we citizens are drowning. As working families, we have to budget our finances and live with what we have by making want and need decisions. Oregon -- make government funding accountable to what funding is available instead of generating more funding. PLEASE start budgeting wants/needs based on what is already available and start tightening areas where many dollars are being wasted by "want" programs.
