

Submitter:

Wendy Hunsaker

On Behalf Of:

Committee:

Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This the first time I've written to submit testimony on a bill, but as it seems our controlling party is completely out of touch with its constituents across our entire state I felt it necessary.

Oregonians need you to vote NO on HB 2025. It's lunacy. As leaders in charge of Oregon Transportation you have been given millions of our hard earned dollars to use on building roads, repairing roads and maintaining infra structure. That is it. You have proven repeatedly that you have wasted our transportation monies on projects that are far outside those parameters. You have "lost" money ...a lot of money... in your budget mismanagement and you have proven yourself unworthy of getting more until you show us where all your previous money was spent. Oregonians are broke. Businesses are fleeing. And you all are behaving like drug addicts looking for your next fix when it comes to spending our hard earned dollars. If you need some help slashing your spending open your books and ask those of us who have spent years under your leadership slashing their own business and household budgets to survive! I'm sure we could find some areas to prune. In fact make it a contest! Citizens who can find the most waste to cut in your budget to save taxpayers money get to skip paying taxes this year!

I don't think you realize that the frugal rice and beans economy you have forced on citizens & business owners for years can no longer can pay for your caviar budgets. Vote NO on HB 2025 & get serious about opening your books & slashing waste. We are not feeding your addictions any longer!
