

Submitter: KRISTI MILLER

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

To Whom It Concerns, I've lived in Albany all of my life and we have always had the highest gas prices in the country because of the extra taxes we pay at the pump. I believe the amount we already pay should be enough to fix roads, streets, bridges etc. I have seen a few projects being worked on but it's hit and miss. Could we have an accounting of how that money is being spent? I think we need to be careful with taxpayers money. The State should not be trying to have a record number of Bills each session but perhaps looks at what can be corrected so people can VOTE on some of the things congressmen are passing without input from both parties or voters.

Kristi Miller, Albany, OR
