

Submitter: Thor Hinckley
On Behalf Of: Third Act Oregon
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

On behalf of Third Act Oregon, we're requesting increased funding for critical electrification programs to increase access to charging and lower barriers to decarbonization.

If people are driving, we want that trip to be electrified because it's more affordable and it protects our air. Third Act Oregon wants to do this by making electric vehicles (EVs) affordable for people with low to moderate incomes, investing in more public charging, and accelerating the electrification of the biggest and most polluting trucks on our roads.

Oregonians who purchase an electric car or truck need accessible charging. Funding for Community Charging Rebates and Zero Emission Fueling Program brings key charging infrastructure to rural and underrepresented communities. We thank you for your consideration in this matter.
