

Submitter: Ritch Hanneman
On Behalf Of: to protect ODOT's big mistake.
Committee: Joint Committee On Transportation Reinvestment
Measure, Appointment or Topic: HB2025

Increases taxes for the lack of oversight of ODOT management. Let's not look at a bill by the GOP that would NOT raise taxes. NO let's promote the people that caused the problem .

And then cover it up and make the public pay for it. ODOT can't cut costs and get rid of waste full projects. OH say ,TOLLING now that would be a great project to quit. The savings would actually be a step in the right direction .

How about dump DEI and the salary savings would be great. An 80 cent a gallon tax on gas is just the beginning. We may even see the state use it for WILDFIRES .

Another

great mismanaged problem . Are our politicians taking lessons from California? Will the politician's handlers continue to tell them this is what is needed for the good of the Party?

After all they must control and destroy Oregon

Again our brilliant politicians won't take the correct road to stop the state from slipping into a hole. NO they stay the course into the hole and enjoying the ride .

And no one can see how this drives companies out of Oregon and makes Oregon the laughing stock .
