Measure, Appointment or Topic: HB2025

Joint Committee on Transportation Reinvestment,

My husband and I have lived in the St. Johns neighborhood for over 12 years and we are extremely worried about getting trapped here in an earthquake. We desperately need funding to repair just one of the bridges so that we can all get out safely and/or emergency services can reach all of us. This has the potential to be a major catastrophe if we do nothing to repair one of the bridges. Please support this bill in defense of the thousands of St. Johns families and residents. This catastrophe can be prevented if you make the right decision in support of this bill.

Thank you.

Erin Neff-Minyard
