

Submitter: Ben S

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I support hb2025 and urge its passage to invest in and protect our public transit systems! Our public transit provides safe, low cost means of navigating our city and provides good jobs and environmental benefits while doing so!

Growing up, my classmates and I had to commute into the city for school. Many of us, took transit from as far out as Cornelius to get to and from school every day. I understand how vital it is to have a system that supports all of our communities. Without the funding on this bill, those far reaching lines will likely face cuts and the experience of my classmates and I would no longer be possible.

Please vote yes on this measure.
