

Submitter: Todd Hutchinson

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I ask for your help for people who rely on public transportation in Oregon. While I have other options available to me, some of my fellow Americans do not have that luxury or would otherwise experience hardship without it. I choose to take public transportation because it is a resource that helps my community, saves me money in a difficult economy, and makes my commute far less stressful, reduces traffic, and pollutes less in the process. Please help protect these valuable features of our American way of life.
