

Submitter: Hayley Berra

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I live in the St Johns area of Portland. In the event of an inevitable earthquake in the near future, my family (which includes my toddler son) would be exposed to health and safety exposure! My family is especially vulnerable because of the reckless disregard our City showed when allowing the storage of oil at the CEI Hub. My mother and stepfather are just a couple blocks away and my own family is less than a mile away.

I am asking, no, pleading that you allocate \$5 million so that the city of Portland can do the design work necessary to rebuild one of the bridges that WILL collapse, as determined by PBOT. Without a standing bridge, there no emergency route. We won't be able to get to our family and help won't be able to get to us. My family is just one of many who make up this neighborhood and I am scared of what will happen if the City does not enable the rebuilding of a bridge that could mean life or death to our precious families and communities.

Please help us be safe. Support HB 2025.

Sincerely,
Hayley Berra
