

Submitter: Dave King  
On Behalf Of: self  
Committee: Joint Committee On Transportation Reinvestment  
Measure, Appointment or Topic: HB2025

Hi, My sweet wife and I live near the St Johns Bridge with a view of the white tanks of the CEI Hub. Of course we are on the side of the "Cut" that will isolate us and all our neighbors when the "Big One" hits. The bridges over the Cut would not survive the huge and prolonged quake. Neighbors have been lobbying for rebuilding the bridge at Columbia Blvd. That is a good idea because the disaster would be even worse if there was no way for vehicles to cross. All the bridges are in poor shape. I've been told that no one wants to take responsibility for maintaining them. So when the Transportation bill comes across your desk, please add money to pay for designing a strong bridge at Columbia Blvd. Thank You, Dave King
