Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This is going to far, my town has doubled in size in 5 years and when we got here we always said Oregon has great roads so much better than California.

Here is the problem it is getting worse every year, even though we have doubled in size as have most towns in the last decade. That means you have taken in at least twice as much revenue and taxes so you have plenty of money to fix our roads. Just spend money earmarked for roads on roads.

With the exception of residential neighborhoods very few new road get created, so you should be maintaining the old roads.

Stop sending our money to DEI and Woke agendas, stop giving my tax dollars to illegal aliens and homeless that never works. Just take care of the people that are paying the taxes.
