Measure, Appointment or Topic: HB2025

Hello,

This bill, if passed, would add taxes to Oregonians who are already struggling with the economy and being able to buy the necessary items for life especially those on a fixed income. Further more the people in rural areas have to drive farther for work, groceries, etc and therefore would be taxed even more if this was passed. This would also put a huge tax on the agricultural businesses that use diesel for machinery but never drive on the road with said machinery meaning they are essentially taxed without representation. I strongly urge you to oppose this bill as it would negatively affect Oregonians. Thank you and God bless.
