Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I oppose House Bill 2025 because I cannot afford what this bill will cost me. I am on a limited budget and live on my social security and VA disability. The price of gas in North Plains alone just went up for gas stations within the City limits. And "equity" bike lanes? No one is going to ride their bikes to Portland especially to go to work. I would love to know how in the world we would've known about this bill if not for our Representative? When was it publicly announced to EVERYONE in this state no matter what their political beliefs are?
