

Submitter: Keegan Sentner

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As a citizen of the state of Oregon, I'm looking to see transportation measures and programs that increase accessibility for communities, families, and children to get to and from work, school, and necessary locations. At the same time as increasing transportation measures, we can use this opportunity to institute more sustainable and energy-efficient transportation to establish a foundation for future transportation measures. I'd love to see us be a leader in this field and push the country toward more accessible public transport, energy efficient programs, and more inclusive and accessible programs.
