

Submitter: Farris Serio

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I would like to see dedicated funds applied to expanding off-street projects, especially cycling paths. As a trauma surgeon I see many pedestrian and cyclist vs auto casualties that might be avoided with dedicated bike/walking/alternate transportation paths. I also cycle for exercise and transportation and have been involved in many near-misses with distracted drivers that may have been avoided with dedicated off-street projects.
