

Submitter: Mark Cameron

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

My name is Mark Cameron from Eugene, Oregon. As your constituent, I am strongly opposed to HB 2025. This bill penalizes hard-working families and individuals with exorbitant tax increases at a time when the cost of living is already making it difficult just to get by. Raising gas taxes, increasing registration and licensing fees is not going to solve Oregon's transportation issues. We need to put our efforts into fixing what is broken and not waste more taxpayer time and money. This bill would reward an agency for its failed leadership and apparent inability to forecast and steward its resources. We can do better to come up with real solutions that are smarter and more effective without punishing Oregonians by unnecessarily raising taxes.
