Measure, Appointment or Topic: HB2025

You don't have to spend more than a couple of minutes watching an ODOT construction project to realize they normally have at least twice the number of workers necessary for what a private enterprise would use. You'll likely find at least a couple sleeping in one of the many vehicles they use to drive separately to the project site and typically travel; on paid time..

A kindergarden auditor can figure out in seconds there is a huge opportunity for waste reduction in ODOT!
