

Submitter: Jack Sylvester

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This tax would impose hardship on working class Oregonian's. We the people do not support additional taxes for big government pet projects nor do we support mismanaged spending without accountability. Before we hand over government an open wallet maybe we should look at the last 3 yrs. where our tax dollars have been spent and the government should learn to synch there belt on spending Oregon taxpayer dollars. I of one project that Odot did in Lapine Or. where they designed an overpass of the rail line and no due diligence was done for engineering then come to find out the bridge was placed over a diamatious earth lake bed and the project was aborted which was a 17 million dollar waste of taxpayers money. We're not here to fund Tina's DEI project for children learn in fact it goes against the core values of what education is about.
