

Submitter: Elizabeth Eggers

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

I want us to work together - significantly, seriously, measurably - to reduce greenhouse gas emissions, to reach the objectives we have set. I want to see a package that will enable my children, grandchildren, and great grandchildren (all of whom are now living on this planet we share) to have an environment that supports life. Electrification of transportation is a huge and necessary element in reaching that goal.
