

Submitter: Colton Roske

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

HB 2025 tax increases will make it difficult for new families, such as my own to struggle even further. It is already difficult enough spending hundreds a month on fuel to get to and from work. Current registration fees already have a big impact on our monthly budget, as well as most Oregonians. Lastly, adding a tax to purchasing vehicles will not only further crush the market, but will make it far more difficult to purchase a vehicle of quality as everyone will have to purchase a cheaper car to pay for the taxes. This bill is not for the people of Oregon, this will only hurt the financial situation of most Oregonians who are already struggling to get by.
